

Our support to the affected areas
of “the heavy rain disaster in July 2018”

Our Support

Liaison were put in place for the affected local municipalities

Chugoku Regional Development Bureau dispatched **liaison, emergency disaster prevention measures members** to proactively survey required demands of affected autonomy. We prepared various support operations and shared the information of disaster and its recovery situation.

794 liaison members sent to 17 municipalities and to an institution from July 5 till August 31.

Preparation of supports at Kurashiki city hall

Prevention for health damage

The dust prevention countermeasures by water sprinkler trucks

In affected areas, remarkable increase of dust was caused by operating fleets for restoration.

We added road sweepers and water sprinkler trucks again from all over the nation to affected areas specifically to Mabi Town.

Sprinkling water on affected areas to control dust cloud
Care for the health of flood survivors

【Mabi Town, Kurashiki City, Okayama】

Providing drinking water Relief supplies transport by ships

We provided **potable water supplies** for damaged areas without water supply which saw **difficulty in accessing** clean water such as islands or isolated districts.

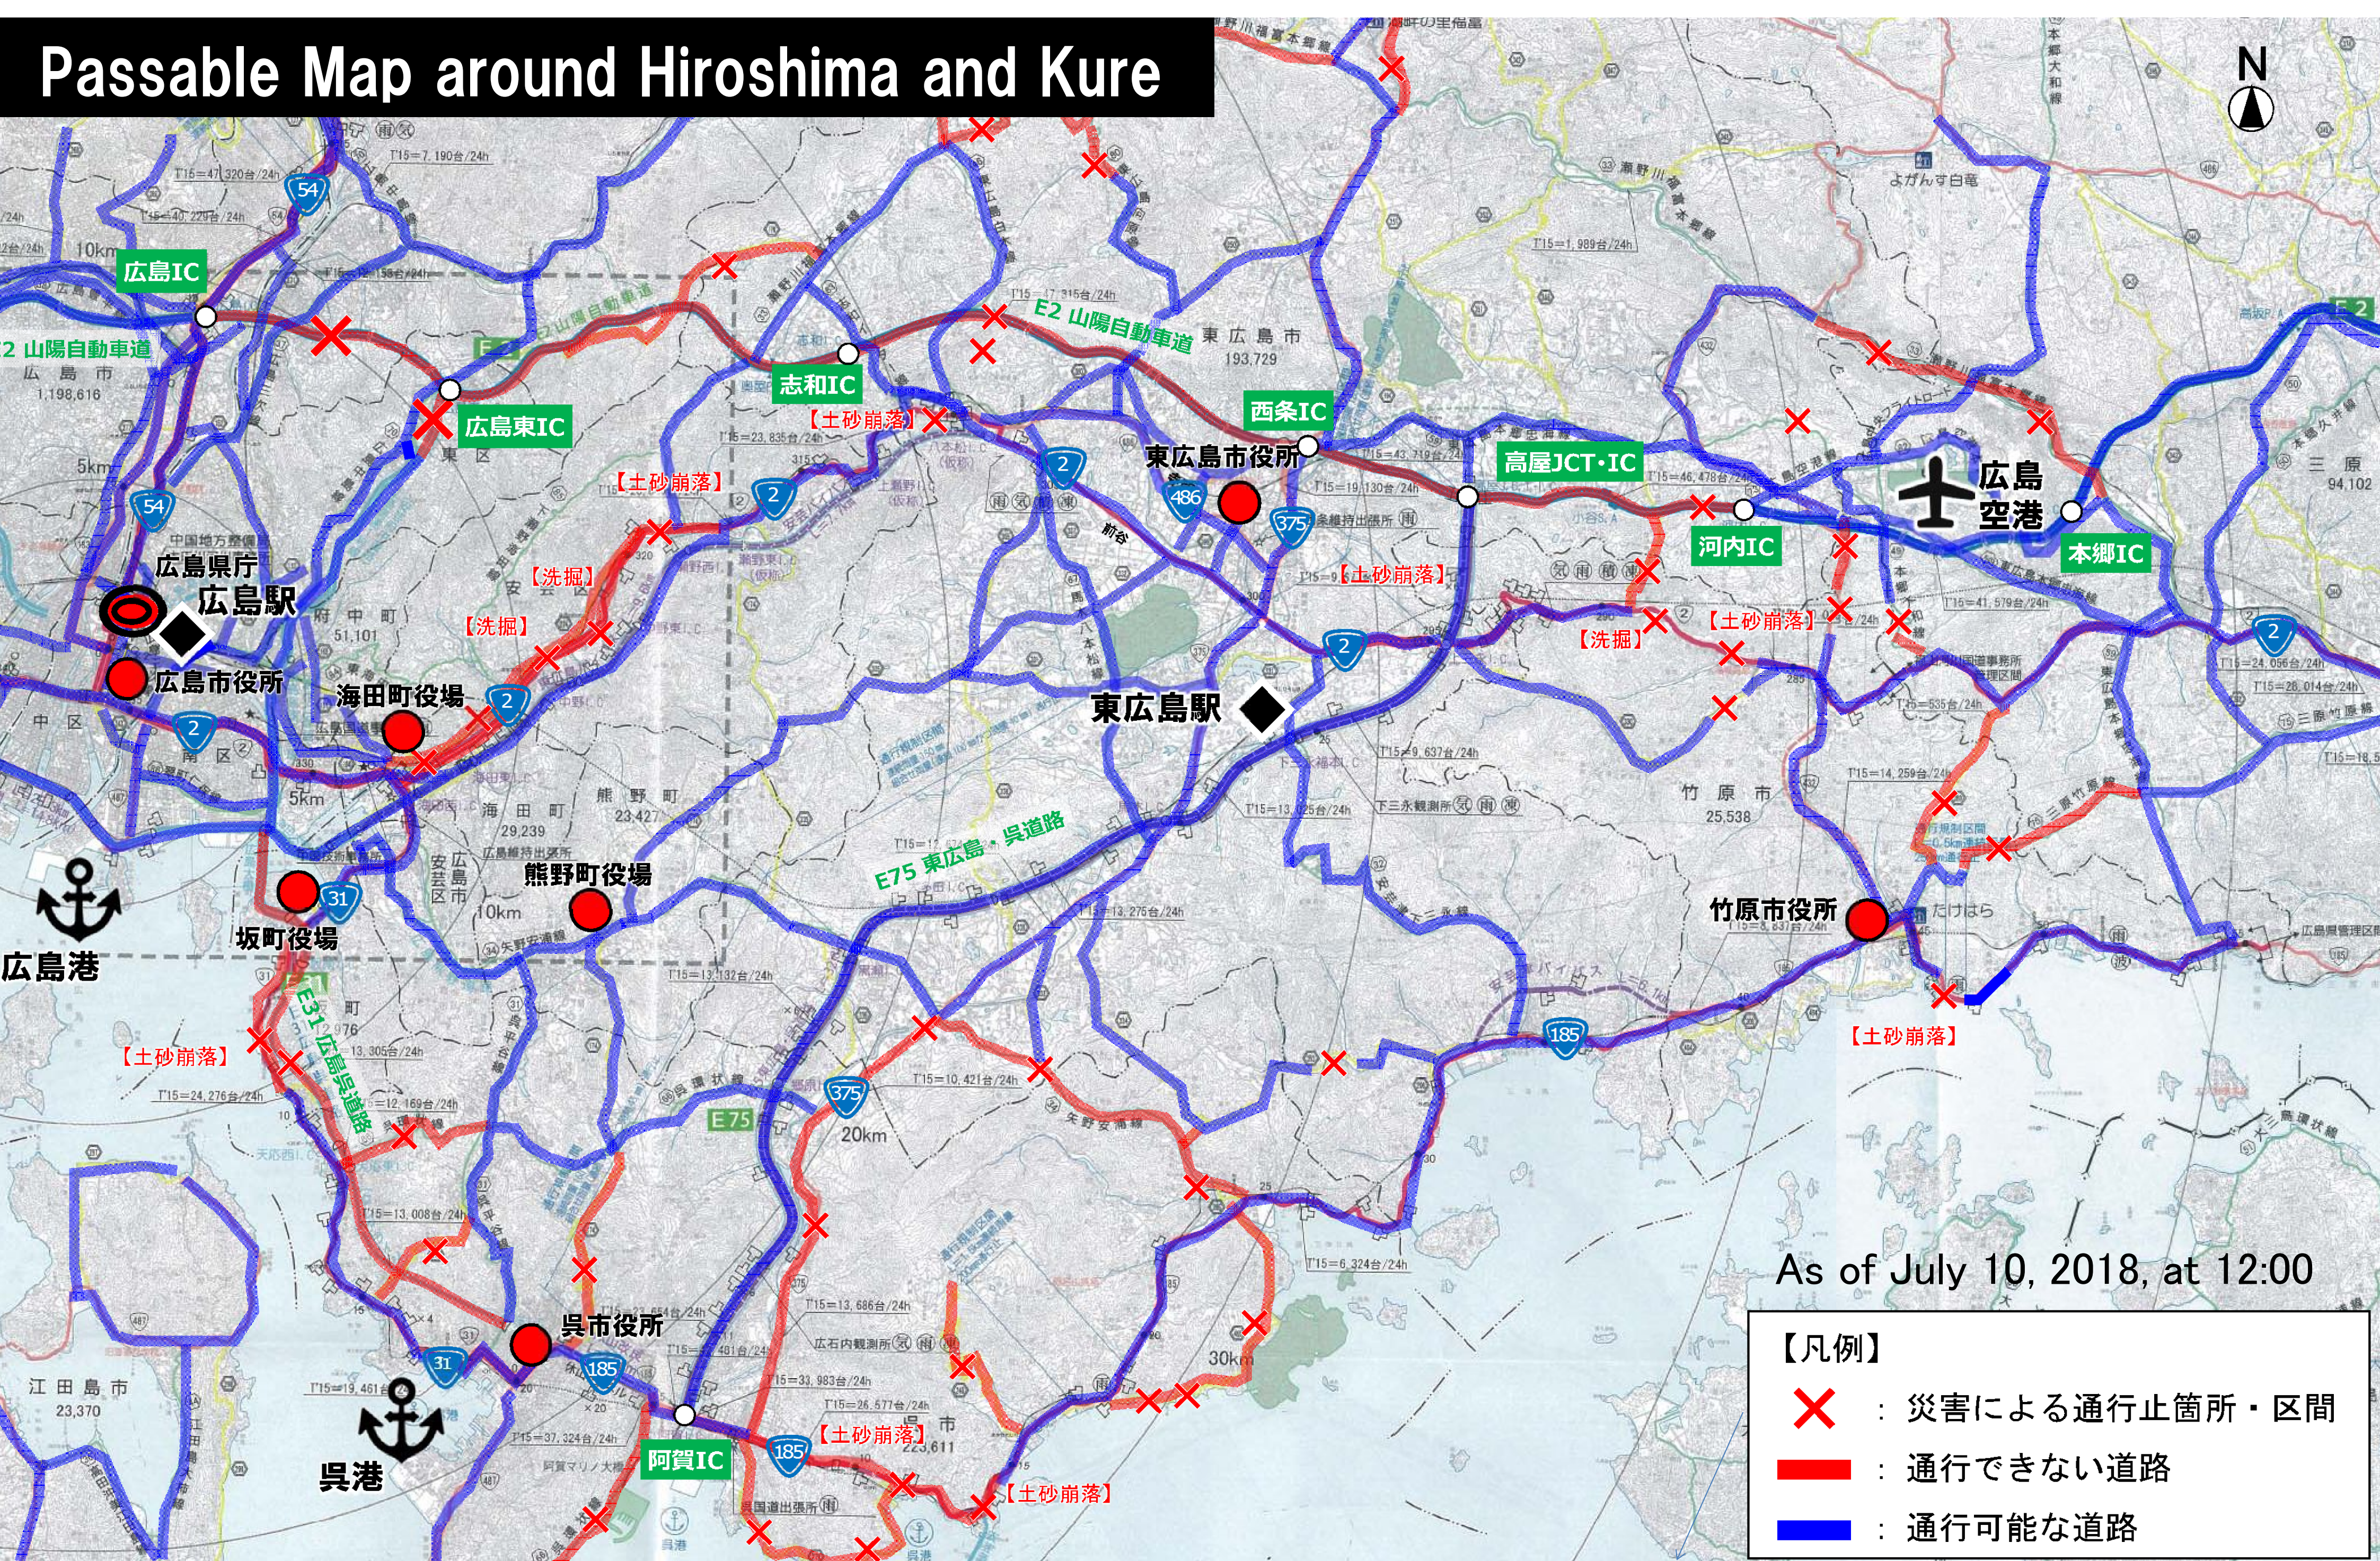

【Kamagari Bay, Kure City, Hiroshima】
Supply drinking water to survivors

Everyone wanted to know where “the passable routes” were

Because traffic restriction was extended for a long time with too many “dots” signing closed traffic, phone calls for the passable routes saw a tremendous increase.

Therefore, we made “Passable Map” which showed people traffic restriction and passable routes at hand. We were able to respond to the needs of traffic users.

Passable Map around Hiroshima and Kure

【Legend】

- × : Closed areas because of the disaster
- : Impassable way
- : Passable way
